ENHANCING LIVES THROUGH DESIGN

Introducing MandiCasa's Latest Kitchen and Closet Finishes

Carefully developed to meet the latest trends in interior design, MandiCasa's newest luxury finishes bring distinctive aesthetics to the [kitchens](#) and [closets](#) in our collection.

VINTAGE LIGHT LACQUERS (KITCHENS)

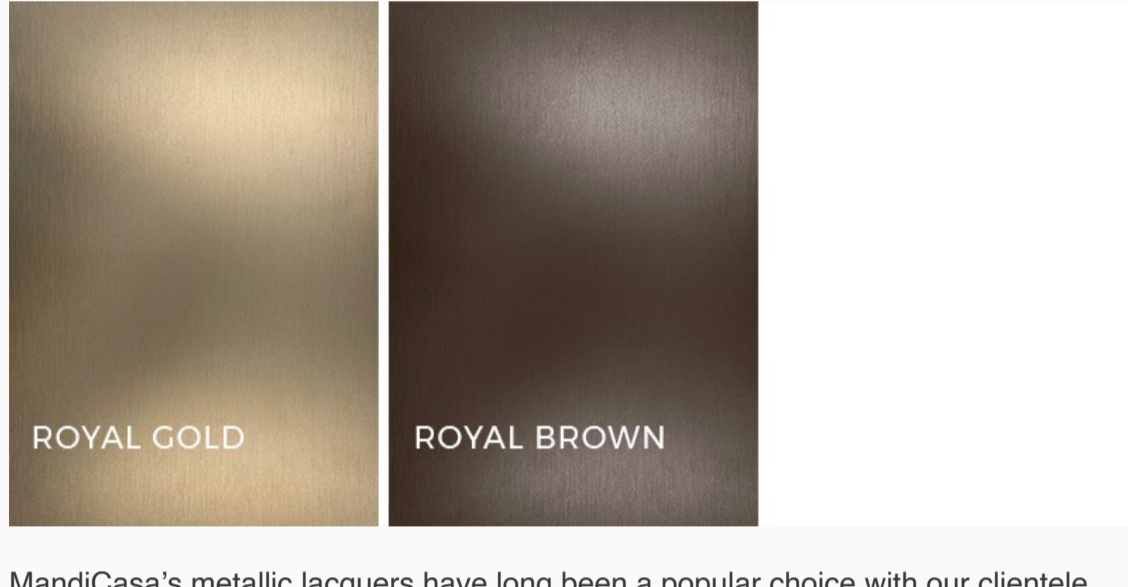

Our Vintage Light lacquers are hand-crafted and applied meticulously by experienced Italian craftsmen to give the cabinet doors an upscale industrial look.

The resulting surfaces incorporate light and shadows in an organic and dynamic way. Protective coatings applied to the cabinets ensure the product's longevity and integrity.

These new finishes combine extremely well with the woods and smooth lacquers in the MandiCasa range, opening the door to very interesting aesthetics that can fit different types of interiors – from the more traditional to the most contemporary.

NEW METALLIC LACQUERS (KITCHENS)

MandiCasa's metallic lacquers have long been a popular choice with our clientele, who pair them with woods, smooth lacquers, and stone finishes to create personalized contemporary kitchen designs. Now, our metallic lacquers range is expanding with two new offerings: Royal Gold and Royal Brown.

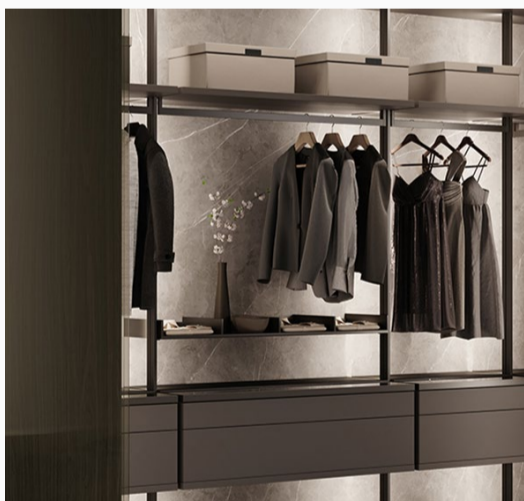

These types of lacquers recreate the look of metal sheets thanks to a process that uses brushed metal micro-beads to yield a satined surface with vertical lines. This characteristic gives the cabinets a tridimensional and tactile quality, producing plays of light and shadow and increasing the aesthetic value of the cabinetry.

THE CAMERINO CLOSET DONS NEW FINISHES

A striking new combination of finishes is elevating Camerino - our [total-opening, compact "walk-in" closet](#) – to new levels of sophistication.

The textured exterior in Cannelè Walnut dialogs with the gorgeous backdrop provided by the interiors in Kera Pietra Grey ceramic. The [total-opening doors](#) in smoked glass tease the beauty on the inside, then fold on themselves to create a stunning reveal of the contents of the closet. The integrated LEDs can be sensor-activated, dimmable, and remote-controlled, adding to the scenic impact of the unit and turning it into a true stage for a person's clothes collection.

Camerino's extra depth makes it very spacious while its opening system, patented U-shape, and minimalist internal structure allow easy access to every inch of it, sides and corners included.
